

Fluid End

Repair Services

Get more value from your hardware.

Frac fleets need to get as much value as possible from every asset; and that includes fluid ends. That's why Vulcan Industrial performs precision repairs, reconditioning—and even reengineering—of fluid ends from any manufacturer.

Vulcan Industrial maintains repair centers nationwide to provide frac fleets with fast-turnaround service from an engineering level on up. Our fluid end specialists are experts at helping you extend asset life, minimize working capital and free up trapped value from fluid end investments through repairs; from straightforward reconditioning through design conversion and upgrades.

And we do it all with a level of service you'd expect from Vulcan. Our repair team can personally help you assess the condition and next steps of getting practically any fluid end back into service. We also go out of our way to make the whole process low-maintenance on your end with on-site engineering assessments and shipping arrangements—so you can better focus on bigger-picture responsibilities.

Fluid End Repair Services

- Weld Repairs of Washed Out Bores
- Valve Seat Taper Repairs
- Stuck Cap Removal
- Thread Repairs
- Total Component Replacement
- Equipment Reengineering
- Bulk Reconditioning Orders
- Parts Support
- In-Person Assessments at Your Facility

Need a service you don't see listed here? Ask us about it. Chances are we can make it happen—and make it easy on you.

Engineering Level Analysis

When repair facilities get busy, fleets often settle for using just any old machine shop. But with experienced engineers available at our repair centers, Vulcan can ensure performance from the ground up.

Fast Turnaround

Not only are we nearby, but we also work hard to minimize turnaround times for each and every repair. We make this happen through professional project management, tight process controls and a strong work ethic.

Subject Matter Expertise

From engineering to operation, our repair team has a career focus on fluid end products and performance. Don't risk a non-expert; entrust your hardware to a team who's seen it all and can fix it the right way.

Service Centers Near You

Vulcan Industrial offers repairs through facilities across the country, so you can streamline logistics and ensure economical service.

Dedicated Metallurgy Lab

Vulcan Industrial's advanced metallurgy lab gives our repair specialists access to the materials understanding they need to put science on your side. Because helping you get more from your equipment starts with the steel.

Quality, Precision Repairs

In addition to a number of industry certifications, our facilities implement rigorous QA/QC standards for all repairs, reconditioning and rebuilds. Nothing leaves the shop short of perfection.

Stay in the Loop

Forget guesswork; when you choose Vulcan Industrial repairs, you benefit from our high-performance supply chain and project management sophistication. We ensure your repair stays on track and provide regular updates on project status throughout the process.
