

VULCAN

V-Series™

Q3000

In an industry that constantly expects more from its equipment, the Vulcan V-Series™ delivers. With powerful engineering and advanced metallurgy, these fluid ends offer stronger uptime numbers and best-in-class reliability, longevity and field serviceability.

Complete Cross Compatibility

Our simplified design means that all components are compatible across the V-Series™ suite.

- / V-Series™ T2250
- / V-Series™ Q2500
- / V-Series™ Q2500 — 60"
- / V-Series™ Q2700
- / V-Series™ Q3000
- / V-Series™ T3000

Field Replaceable Packing Sleeve

- No in-line seal to the packing bore
- No need to remove from unit to replace
- Does not require electric or air compressed tools

Machine Finished Cross Bores

No hand blending for a more consistent quality and precision

Advanced Stainless™ Steel

Higher abrasion resistance than the industry standard 17-4/15-5PH materials, allowing for longer life on valve tapers and sealing areas

The V-Series™

Intelligent Design

Guaranteed Secure

Stud and nut fasteners vs. socket head screws

9 vs. 8

bolts per bore
(Vulcan standard)

bolts per bore
(competitor standard)

Modular suction-side access system
maximizes structural integrity

Direct Drop-in Replacement—No Truck Modifications

- Direct drop-in for OEM QEM3000/5000
- No special high change-out parts like valves, seats, packing and plungers

Modular Suction Cover Retainer System with 3" Hex

- Includes full maintenance with system install
- Eliminates seized and damaged fluid end threads
- Ends retainer nut cracking

Advanced Stainless™ Steel

Percentage Performance Increase vs. Competitors
